

About open access resources and access to restricted material

- The Internet gives access to an increasing number of quality open access resources. These resources can supplement or replace online library materials as more and more scholarly and peer-review journals open their back issues, and others have converted partially or totally to open access for all issues.
- Open Access refers to resources that are freely available for viewing and/or use, but be sure to check the copyright or permissions statement before use.
- In addition to this, research materials from various databases or publishers are made accessible via personal accounts and/or on special conditions.
